OTISS

Oklahoma Tiered Intervention System of Support

What is OTISS?

OTISS is Oklahoma's intervention model for **identifying and addressing academic and behavioral difficulties** that interfere with students' success in school. This model was developed, and is currently supported, by the Oklahoma State Department of Education (OSDE).

Decisions on what intervention(s) to provide each student are made by the school's OTISS team - based on information regarding how the student performs and behaves. A student's response to interventions are monitored on an ongoing fashion.
