

OKMTSS Data: What Parents Should Know

In Oklahoma Multi-Tiered System of Supports (OKMTSS) schools use data to understand how students are learning and what support they may need. Data helps schools and parents work together to support student success.

Universal Screening Data (All Students)

- Reading and literacy screening data
- Math screening data
- Behavior screening data
- Attendance and classroom performance indicators

Progress Monitoring Data

- Ongoing checks of student skill growth
- Student response to instruction or intervention
- Graphs or charts showing progress over time

Academic Performance Data

- Classroom assessments and benchmarks
- Grades and course performance
- State assessment results

Behavior & Social-Emotional Data

- Office discipline referrals and behavior logs
- Attendance and tardiness patterns
- Social-emotional screening information

Why This Data Matters

OKMTSS data helps schools improve core instruction, decide when additional supports are needed, and partner with families using clear information.

Parent Questions You Can Ask About MTSS Data

“What universal screening data did my child take?”

“What progress monitoring results show how my child is doing?”

“What academic and behavior data are we using to plan supports?”

“How often is my child’s progress reviewed?”

“How will you share results with us?”
